SUMMARY OF TECHNICAL SKILLS

- Experienced in relational database design and SQL programming.
 - Entity-relationship modeling in Lucidchart, normalization, SQL, MySQL, UML class diagrams
- Experienced in object-oriented software design and development.
 - C#/.NET, Python, Visual Studio, VS Code
- Experienced in front-end web development and deployment.
 - HTML, CSS, vanilla JavaScript, responsive design, Git/GitHub, Cloudflare Pages
- Knowledgeable in systems analysis and agile development practices.
 - Requirements gathering, use case modeling, Scrum ceremonies
- Knowledgeable in network configuration and security fundamentals.
 - LAN/WAN and router configuration, Wireshark, Cisco Packet Tracer
- Hands-on client and course project work, including AI-assisted development workflows.

EDUCATION

West Virginia University | Morgantown, WV

Expected Graduation: May 2027

John Chambers College of Business and Economics

GPA: 3.5

Bachelor of Science in Business Administration

Major: Management Information Systems (MIS) | Minor: Business Cybersecurity

Relevant Coursework: Database Management Systems, Business Application Programming, Systems Analysis, Network Security, Cybersecurity Strategy, Risk & Compliance, Data Privacy, Confidentiality & Security, Data Communications, Advanced Information Technology, Managing Information Technology, Ethics of Information Technology

PROFESSIONAL EXPERIENCE

Tech Intern | Martich Tech Solutions | Weirton, WV

August 2024 – August 2026

- Installed and configured network infrastructure (routers, switches, LAN/WAN, security systems) for 10+ clients
- Deployed and tested 3 POS systems, handling hardware setup, network connectivity, and pre-launch validation
- Diagnosed and repaired 5 custom-built PCs, covering hardware replacement and OS-level troubleshooting

RELATED PROJECT WORK

Freelance Website Project — HTML, CSS, JavaScript, Cloudflare Pages, Claude Code

August 2026

- Designed, built, and deployed a promotional site on Cloudflare Pages for a retired professional athlete, directing an AI-assisted development workflow end to end while managing the client solo across 28 revisions in one week
- Created the site to give the client a professional platform for promoting and selling his forthcoming memoir, using his life story to draw readers toward the release

NFL Full-Stack Application Project

January 2026 – May 2026

- Collaborated on a 4–5 person team to build a full-stack application with REST API integration
- Developed 10+ modular UI components supporting scalable front-end architecture
- Tested and validated API endpoints, improving application stability and performance
- Participated in weekly sprint cycles with iterative debugging and feature deployment

Relational Database Design (SQL)

August 2025 – December 2025

- Designed normalized relational database schema with 10+ entities and relationships, modeled as entity-relationship diagrams in Lucidchart
- Built and validated 20+ MySQL tables with PK/FK constraints, ensuring referential integrity and data consistency
- Wrote 100+ complex SQL queries (joins, aggregations, filtering) for data analysis and reporting

C# Development

August 2025 – December 2025

- Developed 5+ C# applications using object-oriented programming principles
- Identified and resolved 50+ bugs/issues through systematic debugging in Visual Studio
- Managed version control across multiple repositories using Git/GitHub
