SUMMARY OF TECHNICAL SKILLS

- Relational database design and SQL development
 - MySQL, Azure SQL, stored procedures, triggers, ERDs in Lucidchart, normalization, PK/FK constraints
- Object-oriented programming and application development
 - C#/.NET, UML class diagrams, Visual Studio
- Full-stack application development and deployment
 - Python, FastAPI, Streamlit, REST APIs, Git/GitHub, GitHub Actions (CI/CD), Microsoft Azure
- Front-end web development
 - HTML, CSS, JavaScript, responsive design, Cloudflare Pages
- Network setup and security fundamentals
 - Router configuration (LAN), Blink security camera installation, Wireshark, Cisco Packet Tracer
- Systems analysis and agile development
 - Requirements gathering, use case modeling, UML documentation, Scrum ceremonies

EDUCATION

West Virginia University | Morgantown, WV

Expected Graduation: May 2027

John Chambers College of Business and Economics

GPA: 3.5

Bachelor of Science in Business Administration

Major: Management Information Systems (MIS) | Minor: Business Cybersecurity

Relevant Coursework: Database Management Systems, Business Application Programming, Systems Analysis, Network Security, Data Communications, Advanced Information Technology

PROFESSIONAL EXPERIENCE

Freelance Web Developer | Client Project | Remote

August 2026

- Designed, built, and deployed a promotional website on Cloudflare Pages for a retired professional athlete, giving him a platform to promote and sell his upcoming memoir
- Delivered the finished site in one week while managing the client relationship solo and incorporating 28 rounds of client feedback
- Directed an AI-assisted development workflow (Claude Code) end to end, from requirements and specification through code review and deployment

Tech Intern | Martich Tech Solutions | Weirton, WV

August 2024 – August 2026

- Configured and deployed routers, POS systems, and security cameras for 10+ business clients
- Deployed 3 point-of-sale systems end to end, from hardware setup and network connectivity through pre-launch validation, so each business was ready to go live
- Diagnosed and resolved hardware and OS-level issues, including rebuilding and repairing 5 custom PCs

RELATED PROJECT WORK

NFL Playoffs Full-Stack Application | Python, FastAPI, Streamlit, Azure SQL

January 2026 – May 2026

- Built a full-stack NFL playoffs app with a Python/FastAPI REST API (8 endpoints), a Streamlit front end, and an Azure SQL database
- Designed a 10-table relational database in Lucidchart and wrote 9 stored procedures plus a trigger that automatically logs every admin change to the game schedule
- Automated API deployment to Microsoft Azure with a GitHub Actions CI/CD pipeline
- Delivered features in weekly sprint cycles with iterative testing and debugging

Relational Database Design (SQL)

August 2025 – December 2025

- Designed a normalized relational schema with 5+ entities and modeled it with ERDs in Lucidchart
- Implemented the schema in MySQL with primary and foreign key constraints to enforce referential integrity
- Wrote 100+ SQL queries using joins, aggregations, and filtering to answer business reporting questions

C# Development

August 2025 – December 2025

- Built 5+ C# applications in Visual Studio, designing each with UML class diagrams and core object-oriented principles
- Used systematic debugging and Git/GitHub version control to test, track, and refine code
